

CIFO ANNUAL COMPLAINTS STATISTICS - 2025

These statistics cover the work of the Channel Islands Financial Ombudsman (CIFO) for the period between 1st January 2025 and 31st December 2025.

CIFO is the joint operation of two statutory ombudsman roles, established in law by the Financial Services Ombudsman (Jersey) Law 2014 and the Financial Services Ombudsman (Bailiwick of Guernsey) Law, 2014. The primary role of CIFO is to resolve complaints about financial services provided in or from Jersey, Guernsey, Alderney and Sark (collectively the Channel Islands).

The legislation sets out CIFO's 'mandate' – in particular, the types of financial services that can be complained about, the type of complainant that may use the service and the time limits that apply. Complaints may also be outside of CIFO's mandate for reasons that include if the matter has already been, or is being considered in another forum such as a court or if the complainant has not suffered any compensable loss.

Please note that some percentages may not add up to 100% due to rounding.

ANALYSIS OF COMPLAINTS REFERRED TO CIFO

This section provides information concerning complaints, which are all complaints that have been received whether they are ultimately deemed within CIFO's mandate or not.

FIRM COMPLAINTS STATISTICS

The published summary complaints statistics relate to the period between 1st January 2025 and 31st December 2025. Note: there are numerous factors that can influence the volume and nature of complaints made against a particular FSP. These can include:

- Some financial service sub-sectors will generate more complaints than others in relation to their number of total customers.
- Some sub-sectors have more transactions (or customer interactions) per customer than others which can result in higher complaint volumes.
- Some FSPs are larger and can have more customers which can result in more complaints even if the number of complaints as a proportion of its total customer base is lower than other comparable FSPs.
- FSPs within the same sub-sector (e.g., retail banking) can have a different mix of products and services with some types of products and services being more likely to generate complaints than others (e.g., credit card accounts, current accounts with debit cards, savings accounts). It is also important to note that a higher volume of complaints does not necessarily have a negative connotation and may simply result from an FSP's more effective signposting of its customers with unresolved complaints to its internal complaint handling and to our office.

The published firm complaints statistics summary relates to the period between 1st January 2025 and 31st December 2025. During this period, CIFO opened 571 complaints about 145 FSPs and resolved 388 complaint cases about 47 FSPs through mediation or a binding final decision. All complaints withdrawn, settled by the FSP prior to CIFO's engagement, and those found to be outside of CIFO's statutory mandate are not included. All FSPs are identified using the legal name that CIFO was advised of at the time CIFO received the complaint and provided to the FSP for confirmation. The 2025 published data can also be viewed using CIFO's searchable webpage.
